

A screenshot of a Windows console window. The title bar at the top reads "file:///D:/Projects/A4/ConsoleApplication1/ConsoleApplication1/bin/Debug/ConsoleApplication1.EXE". The console output displays a list of multiplication facts: 12 x 1 = 12, 12 x 2 = 24, 12 x 3 = 36, 12 x 4 = 48, 12 x 5 = 60, 12 x 6 = 72, 12 x 7 = 84, 12 x 8 = 96, 12 x 9 = 108, 12 x 10 = 120, 12 x 11 = 132, and 12 x 12 = 144. Each line is preceded by a small colored square (green, red, or blue) and the numbers are color-coded: 12 is green, x is red, and the result is blue.

```
12 x 1 = 12
12 x 2 = 24
12 x 3 = 36
12 x 4 = 48
12 x 5 = 60
12 x 6 = 72
12 x 7 = 84
12 x 8 = 96
12 x 9 = 108
12 x 10 = 120
12 x 11 = 132
12 x 12 = 144
```

Code works efficiently and there are no problems, everything works as intended
